Share

Run

```
1  #include <stdio.h>
2  #include <sys/ipc.h>
3  #include <sys/msg.h>
4  #include <string.h>
5
6  struct msg_buffer {
7      long msg_type;
8      char msg_text[100];
9  } message;
10
11 int main() {
12     key_t key = ftok("progfile", 65);
13     int msgid = msgget(key, 0666 | IPC_CREAT);
14
15     printf("Write Data: ");
16     fgets(message.msg_text, sizeof(message.msg_text), stdin);
17
18     message.msg_type = 1;
19     msgsnd(msgid, &message, sizeof(message), 0);
20
21     msgrcv(msgid, &message, sizeof(message), 1, 0);
22     printf("Received: %s\n", message.msg_text);
23
24     msgctl(msgid, IPC_RMID, NULL);
25
26     return 0;
27 }
```

## Output

Write Data: shared memory

Received: shared memory

=== Code Execution Successful ===
