Run

```
1  #include <stdio.h>
2  #include <sys/ipc.h>
3  #include <sys/shm.h>
4  #include <string.h>
5
6  int main() {
7      key_t key = ftok("shmfile", 65);
8      int shmid = shmget(key, 1024, 0666 | IPC_CREAT);
9
10     char *str = (char*) shmat(shmid, (void*)0, 0);
11
12     printf("Write Data: ");
13     fgets(str, 100, stdin);
14
15     printf("Data written: %s\n", str);
16
17     printf("Data read: %s\n", str);
18
19     shmdt(str);
20     shmctl(shmid, IPC_RMID, NULL);
21
22     return 0;
23 }
```

Output

Write Data: shared memory

Data written: shared memory

Data read: shared memory

=== Code Execution Successful ===
