

Code:

```
#include <stdio.h>

#include <string.h>

int main() {

    char fn[50], pat[50], temp[200];

    FILE *fp;

    printf("Enter file name: ");

    scanf("%s", fn);

    printf("Enter the pattern: ");

    scanf("%s", pat);

    fp = fopen(fn, "r");

    if (fp == NULL) {

        printf("Error opening file!\n");

        return 1;

    }

    while (fgets(temp, sizeof(temp), fp) != NULL) {

        // Check if pattern exists in line

        if (strstr(temp, pat) != NULL) {

            printf("%s", temp);

        }

    }

    fclose(fp);

    return 0;

}
```

Output:

```
C:\Users\DefD...
Hello, World!
