

Code:

```
#include <stdio.h>
#include <stdlib.h>
#include <sys/stat.h>

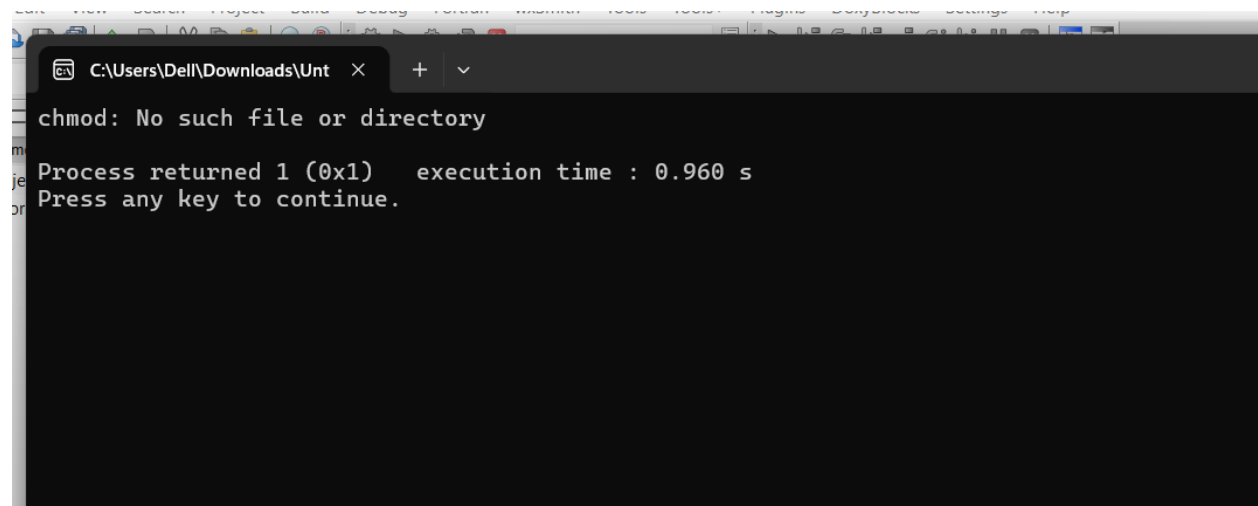

int main()
{
    char filename[] = "file.txt";

    // rw-rw-r--
    int new_permissions = S_IRUSR | S_IWUSR | S_IRGRP | S_IWGRP | S_IROTH;

    if (chmod(filename, new_permissions) == 0)
    {
        printf("File permissions changed successfully.\n");
    }
    else
    {
        perror("chmod");
        return 1;
    }

    return 0;
}
```

Output:

The screenshot shows a Windows command prompt window with a dark background. The title bar at the top indicates the file path "C:\Users\ DELL\Downloads\Unt". The command prompt displays the following text: "chmod: No such file or directory", "Process returned 1 (0x1)", "execution time : 0.960 s", and "Press any key to continue." The window is overlaid on a desktop background with various icons and a taskbar at the bottom.

```
chmod: No such file or directory
Process returned 1 (0x1)   execution time : 0.960 s
Press any key to continue.
```
